Quick-reference-card Customer representative

An assessment by the RvA is scheduled for you shortly. This assessment is reported via the new RvA reporting tool PRISMA.

URL: <https://prisma.bettywebblocks.com/login>

If this is the first time where the reporting is done via PRISMA, you will receive a link from PRISMA. You can create your own username and password via this link. Note: This link is sent from noreply@bettyblocks.com.

The link is valid for three days. If it has expired, you can ask the PCA to send a new one.

1. Log in and change language

Your PCA has asked you to upload documentation required for assessment. You can do this within the PRISMA portal. First of all, log into PRISMA. Change the language to English via Settings:

2. Upload files

In the left column, go to Subprojects.

Open the subproject by clicking anywhere on the line of the subproject.

Go to the tab [Documents]. Click [Upload document].

You can upload files by dragging them to the upload screen or by selecting the files from your directory. Select one or more label(s). See appendix 1 for an overview of all possible labels.

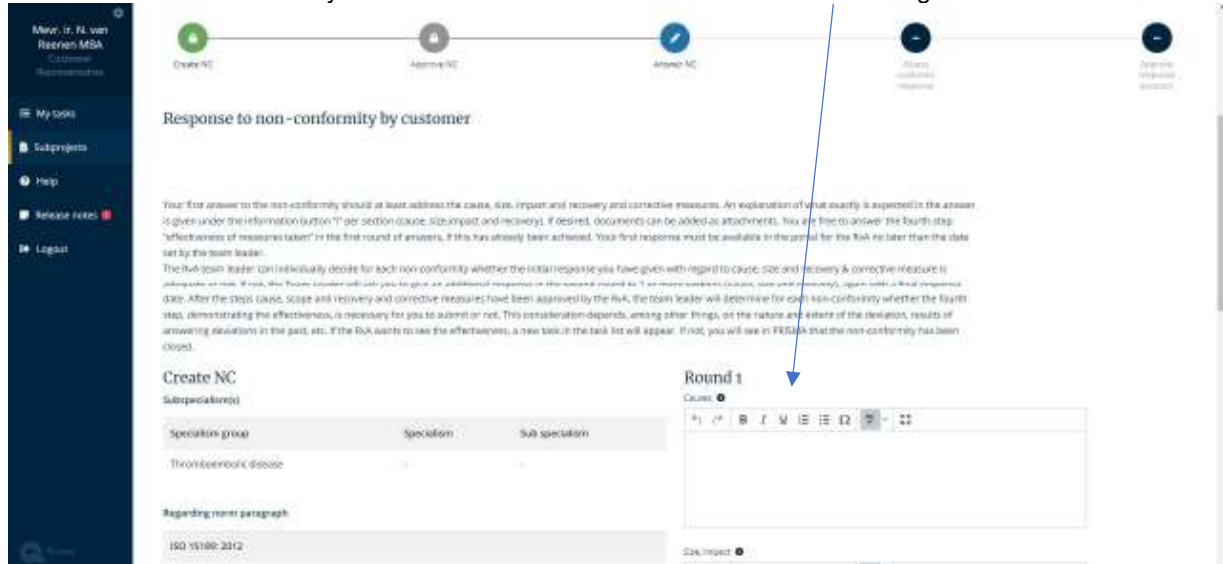

3. Answering NC

You have received an email that a Non Conformity Report is ready for you. Via the link in the e-mail you will reach your task overview. Open the NC via the task list (this can of course also be done via the subproject).

Answers the NC. On the left you will find the NC. You can answer the NC on the right:

During the closing meeting, it was discussed with the team leader whether you only need to supply the first 3 answers or whether effectiveness (the 4th field) should be provided. See the entry fields below:

- Causes
- Size, impact
- Recovery and corrective action (Solution)
- Explanation of the effectiveness of the measures taken.

Note: in the “i” at each entry field, you find an explanation for the field, see below.

At the very bottom of the entry fields, you can add documents (supporting files).

4. Resubmit response to NC

If the Assessor and/or Team leader only partially agrees with the first 3 answers supplied, or because the Assessor and/or Team leader do agree with the submitted first 3 answers, but still wants to see the 4th (Effectiveness of the measure taken), you will receive a new task in PRISMA.

On the left you see the non-conformity and the response of the Assessor and/or Team leader again.

Answers NC	
Round: 1	
Cause	Cause: 127
Size, impact	Size, impact: 456
Recovery and corrective action	CAF: 789
Explanation of the effectiveness of the measures taken	
Assess customer response	
Round: 1	
Cause	Agreed
Size and impact	Agreed
Con. corrective action plan	Not agreed
Explanation of the effectiveness of the measures taken	Inapplicable

At the right hand side you can fill in your response for the second round.

Round 2

Cause

Size, Impact

Recovery and corrective action

Explanation of the effectiveness of the measures taken

Fill in all fields. When status of NC is “Response Partly OK” or “Agreed, but effectiveness needed”, also fill in the fields that were approved in the first round. Here you can enter “See round 1”.

5. Download reports and pdf's

Under the Tab Reports, you will find the reports that you can download.

If you want to send the NCs to colleagues, go to the Non conformity overview and choose "Download PDFs". A zip file will be downloaded, with each NC as a separate PDF file.

6. Monitor progress

There are three ways to monitor progress:

1. In your Task list you can see whether you have any tasks.
2. In the Non conformities overview you can see all NC's and their status.
3. In the Reports tab you can see which Report is available for you.

During the assessment, your subproject has the status New or In progress.

After your subproject has been administratively completed, your subproject will be given the status Completed.

Appendix 1 – Labels

Labels documents (RvA)

- Documentation TL
- Documentation Team
- Documentation CBI
- Concept scope
- Decision forms
- Definitive scope

Labels documents (Customer Representative)

- Documents (ZIP, conform BR005)
