

Annex to declaration of accreditation (scope of accreditation)  
Normative document: EN ISO/IEC 17025:2017  
Registration number: **L 146**

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

**Location(s) where activities are performed under accreditation**

**Head Office**

Laan van Ypenburg 6  
2497 GB  
The Hague  
The Netherlands

<b>Location</b>	<b>Abbreviation/ location code</b>
Laan van Ypenburg 6 2497 GB The Hague The Netherlands	D

<b>No.</b>	<b>Material or product</b>	<b>Type of activity<sup>1</sup></b>	<b>Internal reference number</b>	<b>Location</b>
<b>BDE – Toxicology</b>				
1.	Blood, urine and vitreous humor	Determination of ethanol; headspace gas chromatography with flame ionisation detection	110201 in-house method	D
2.	Blood	Determination of carbon monoxide; visible spectrophotometry	QOL-02106 in-house method	D
3.	Whole blood, urine and vitreous humor	Determination of the content of 4-hydroxybutanoic acid (GHB) and 3-hydroxybutyric acid; LC-MS/MS	QOL-02170 in-house method	D

<sup>1</sup> If there is a referral to a code starting with NAW, NAP, EA or IAF, this concerns a scheme mentioned on [RvA-BR010-list](#).  
If no date or version number is mentioned for a normative document, the accreditation concerns the most current version of the document or scheme.

This annex has been approved by the Board of the  
Dutch Accreditation Council, on its behalf,

J.A.W.M. de Haas

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
4.	Blood	Identification and/or quantitative determination of drugs of abuse; LC-MS/MS Alprazolam, Amfetamine, Amitriptyline, Aripiprazol, Benzoyllecgonine, Clonazepam, 7-Aminoclonazepam, Cocaïne, Codeïne, Diazepam, Desmethyldiazepam, Ethylcocaine, Fentanyl, Haloperidol, Ketamine, N-desmethylketamine, Lorazepam, MDA, MDMA, Methadon, Methylamfetamine, Methylecgonine, Midazolam, Morfine, 6-Monoacetyl-morfine, Noroxycodon, Nortriptyline, Olanzapine, Oxazepam, Oxycodon, Pregabaline, Quetiapine; N-desalkyl quetiapine, Temazepam, THC, 9-carboxy-THC, Tramadol, O-Desmethyl tramadol, Zolpidem, Zopiclon	QOL-00885 in-house method	Blood

*In het Kader van Besluit alcohol, drugs en geneesmiddelen in het verkeer, artikel 16 & artikel 19 & Regeling alcohol, drugs en geneesmiddelen in het verkeer, artikel 7, lid 1 & bijlage 1*

5.	Blood	Quantitative determination of drugs; LC-MS/MS  Cocaine, Morphine, Amphetamine, Methamphetamine, MDMA, MDEA, MDA, GHB, THC, Benzoyllecgonine, 9-Carboxy-THC	QOL-01326 in-house method	D
6.		Determination of Ethanol; GC-FID	QOL-01125 in-house method	D

**CFS - Chemical Identification Investigation**

7.	Various materials, debris and liquids	Identification of ignitable liquid residues by volatile organic component analysis; GC-FID and GC-MS  <u><b>Including Opinions and Interpretations</b></u>  Interpretation of results to determine the presence of ignitable liquid residues	260202 and 260206, QOL-00681; QOL-00797; QOL-00798; QOL-01320; and QOL-01325 in-house method	D
----	---------------------------------------	--	---	---

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
8.	Fire residue, soil, sludge and waste	Identification of volatile organic components; headspace gas chromatography with mass spectrometry  ethanal, methanol, 2-methylbutane, trichlorofluoromethane, n-pentane, ethanol, diethylether, acetone, bromoethane, 2-propanol, carbondisulfide, acetonitrile, methylacetate, dichloromethane, 2-methyl-2-propanol, 2-propenenitrile, 2-methoxy-2-methylpropane (MTBE), n-hexane, 1,1-dichloroethane, diisopropylether, 1-propanol, 2-ethoxy-2-methylpropane (ETBE), nitromethane, 2-butanone, ethylacetate, 2-butanol, tetrahydrofurane, trichloromethane, tetrachloromethane, 2-methyl-1-propanol, benzene, 1,2-dichloroethane, 2,2,4-trimethylpentane, 2-methoxy-2-methylbutane (TAME), 3-methylbutanal, n-heptane, 1-butanol, trichloroethene, 2-ethyl-2-ethoxypropane (TAE), propylacetate, 1,1-diethoxyethane, 4-methyl-2-pentanone, pyridin, 3-methyl-1-butanol, toluene, n-octane, 1,2-ethanediol, 1,1,2-trichloroethane, tetrachloroethene, 1,2-propaandiol, butylacetate, dimethylformamide, chlorobenzene, ethylbenzene, m-xylene, p-xylene, n-nonane, o-xylene, styrene, cumene, n-propylbenzene, 1-ethyl-3-methylbenzene, 1-ethyl-4-methylbenzene, 1,3,5-trimethylbenzene, n-decane, 1-ethyl-2-methylbenzene, a-methylstyrene, 1,2,4-trimethylbenzene, 1,2,3-trimethylbenzene, n-undecane, propylenecarbonate, n-dodecane, benzylmethylketone, naphthalene, n-tridecane, n-tetradecane, n-pentadecane, n-hexadecane	223211 in-house method	D

**CFS - Chemical Identification Investigation  
 Flexible scope<sup>2</sup>**

9.	(Un)known chemicals and/or unknown materials	Qualitative analysis of inorganic and organic components in various matrices using chromatographic techniques; GC-FID/MS/NPD/TCD, Headspace GC-MS, LC-MS (MS) and/or ion-chromatography	QOL-02438; QOL-02493 in-house method	
----	--	---	---	--

<sup>2</sup> The laboratory is obliged to maintain an up-to-date list of activities performed under this flexible scope. This list can be requested from the laboratory.

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
<b>CFS - Explosives</b>				
10.	Watery extracts	Qualitative analysis of anions and cations; ionchromatography	QOL-00863 in-house method	D
11.	Detonators and detonator fragments	Determination of detonators; visual inspection, resistance measuring and eventually testing	163003 in-house method	D
<b>CFS – Drugs</b>				
12.	Powder, tablets and impregnated material	Qualitative analysis of LSD; thin layer chromatography and gas chromatography with mass spectrometry	250301 in-house method	D
13.	Powders, liquids, paste, impregnated materials and tablets	Quantitative analysis of cocaine, heroin, amphetamine and MDMA; by GC-FID	QOL-00714 in-house method	D
14.	Plant material (suspected to be cannabis), cannabis resin slabs and/or parts of slabs and oily liquids suspected to be hashish oil	Identification of cannabis, cannabis resin and hashish oil; combination of external properties, microscopy and chemical analysis	QOL-01100 in-house method	D
15.	Powders, liquids, paste, impregnated materials and tablets	Identification of common drugs; GC-MS: cocaine, heroine, MDMA, amfetamine, metamfetamine, 2C-B	QOL-00629 in-house method	D
16.	Powder and (concentrated) water solutions	Qualitative analysis of the Na- and K-salt of GHB; FT-IR	250801 in-house method	D
17.	Hashish, cannabis and cannabis oil	Quantification of THC; GC-FID	251501 in-house method	D
18.	Tablets and powders	Determination of the MDMA-related organic impurity profile; GC-MS	QOL-00045 in-house method	D

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
19.	Amphetamine powders	Determination of the amphetamine-related organic impurity profile; GC-MS	QOL-00238 in-house method	D
20.	Cocaine powders	Residual solvent analysis; HS-GC-MS	QOL-00707 in-house method	D

**CFS - Microtraces and Materials**

21.	Glass	Securing glass particles from SVO's; visual inspection followed by determining reference and questioned glass by thickness, colour and presence tin layer, preparation for LA-ICP-MS analysis	261007 and 261005 in-house method	D
22.	Solid materials	Qualitative analysis of crystalline compounds; X-ray diffraction	260608 in-house method	D
23.		Identification of elements; XRF	INC-004227 in-house method	D
24.	Paint	Comparative analysis; optical microscopy and infrared microspectrometry	260101 and 260114 in-house method	D
25.	Fibres and textiles	Comparative analysis of textile fibres; optical microscopy and (UV-VIS and infrared) microspectroscopy	131000 and 131100 in-house method	D
26.		Characterisation of textile fibres; optical microscopy and infrared microspectrometry	131200 in-house method	D
27.		Investigation of damages and reconstructed damages in textiles; visual inspection and microscopy	132100 in-house method	D

**CFS - Microtraces and Materials**  
**Flexible scope<sup>3</sup>**

28.	Solid materials	Comparison based on the quantitative element composition; LA-ICP-MS	QOL-02438, INC-001669 in-house method	D
-----	-----------------	---	--	---

<sup>3</sup> The laboratory is obliged to maintain an up-to-date list of activities performed under this flexible scope. This list can be requested from the laboratory.

of **Nederlands Forensisch Instituut**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
<b>CFS – Gunshot residues</b>				
29.	Recovered material on stubs	Analysis of gunshot residues; electron microscopy and X-ray	152000 and 152016 and QOL-00931 in-house method	D
30.	Clothing of suspects	Gunshot residue analysis; visual analysis, sampling and chemographical methods	150027, 152001, 152006, 152007, 152013, 152014 and 152016, QOL-00243; QOL-00833; and QOL-00931 in-house method	D
31.	Clothing or pieces of skin of victims	Gunshot residue analysis; visual analysis, chemographical methods and XRF analysis	150027, 150501, 150502, 152006, 152007, 152008, 152009, 152013, 152014 and 152016, QOL-00243; QOL-00931; QOL-02346; and QOL-02537 in-house method	D
<b>CFS – Toolmarks</b>				
32.	Various materials such as metals	Comparison of toolmarks; visual inspection and microscopy	INC-002819 and INC-00893 in-house method	D
<b>CFS - Firearms and ammunition</b>				
33.	Ammunition	Identification of bullets and cartridge cases; visual inspection and comparison microscopy (with received firearms)	QOL-02071; QOL-02084; QOL-02070; QOL-02074; QOL-02077; QOL-02085; QOL-02076; QOL-02089 and QOL-02088 in-house method	D
34.		Identification of bullets and cartridge cases; visual inspection and comparison microscopy (without received firearms)	QOL-02071; QOL-02084; QOL-02074; QOL-02077; QOL-02085; QOL-02076; QOL-02086; QOL-02088 and QOL-02089 in-house method	D
35.		Test firing of firearms in order to identify bullets and cartridge cases	141101 in-house method	D

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
<b>CFS- Non Human Biological Traces Flexible scope<sup>4</sup></b>				
36.	Plants, animals and micro-organisms	Identification of cell material; - morphological - PCR-sequencing and - PCR-fragment length analysis	QOL-02438, QOL-02475 in-house method	D
<b>BIS - Human Biological Traces</b>				
37.	Various materials	Searching for, securing of and (qualitative) analysis of biological traces as blood, saliva, semen, hair and other cell-material; visual inspection, microchemical, immunological and enzymatic testing	121104, 121203, 121205, 121215, 121301, 121307, QOL-00019; QOL-00324; QOL-00580; QOL-00802; QOL-00809; and QOL-00828 in-house method	D
38.	Animal and human hair	Selection microscopy for DNA examination; microscopy	121307 and INC-002024 in-house method	D
39.	Various materials	DNA extraction, quantification, amplification and typing of STR-systems and the XY amelogenine gene  <b><u>Including Opinions and Interpretations</u></b>  Interpretation regarding comparison (forensic) DNA results on source level	122105, 122116, 122144, 122145, 122146, 122201, QOL-00017; QOL-00023; QOL-00503; QOL-00504; QOL-121209; QOL-00678; QOL-00711; QOL-00793; QOL-00808; QOL-00934; QOL-00957; QOL-01066; QOL-01070; and QOL-01240;  QOL-01139; QOL-02579, INC-000615; INC-000815, INC-000072; INC-002043; INC-002030; INC-002046; INC-002027; INC-002053; and INC-000926  in-house method	D

<sup>4</sup> The laboratory is obliged to maintain an up-to-date list of activities performed under this flexible scope. This list can be requested from the laboratory.

of **Nederlands Forensisch Instituut**  
**Defined departments (KvK: 50384511)**

This annex is valid from: **18-01-2023 to 01-05-2025**

Replaces annex dated: **10-06-2022**

No.	Material or product	Type of activity <sup>1</sup>	Internal reference number	Location
40.	Various materials	Analysis, interpretation and reporting of biological paternity investigation and other biological familial relational investigation (kinship) using STR-systems and the XY amelogenine gene  Sampling and identification excluded	QOL-00507; QOL-122400; INC-002179 and QOL-01015 in-house method  Analysis, interpretation and reporting in accordance with ISFG: Paternity testing commission of the International Society of Forensic Genetics 2002 and 2007  in accordance with Resolution DNA investigation paternity, Law gazette Kingdom of the Netherlands, 2008 417	D
41.		Amplification and analysis of mitochondrial DNA; Sanger sequence analysis or Single base extension	QOL-00516, INC-000072 and INC-002523 in-house method	D
42.		Research for bloodstains, bloodstain identification, interpretation and selection (for further DNA analysis); microscopy and visual inspection	QOL-00344 and INC-002024 in-house method	D
43.		RNA extraction, cDNA synthesis, amplification, typing and interpretation of RNA profiles	QOL-01075 and INC-002523, in-house method	D

**BIS - Human Biological Traces**  
**Flexible scope<sup>5</sup>**

44.	Various materials	Nucleic acid (DNA and/or RNA) extraction; silica-based DNA amplification: thermal cycling based for DNA-extracts, direct substrates and cDNA, SNP and INDEL typing  Fragment analysis; capillary electrophoresis, Sequence analysis, massively parallel sequencing	QOL-02438, 124101, QOL-02506 in-house method	D
-----	-------------------	---	---	---

<sup>5</sup> The laboratory is obliged to maintain an up-to-date list of activities performed under this flexible scope. This list can be requested from the laboratory.
